

Notes on Celestron OAG Dimensions for ASCOM-OAG-FOCUSER

Friday, January 12, 2024 2:20 PM

Notes:

1. Gear inner diameter needs to match 51.85 mm diameter of Celestron OAG focus adjust ring.
2. Base must be extended to match change in diameter of gear.
3. Base Thickness around OAG tube must be less than 3.9mm.
4. Base Clamp diameter needs to match 42.8 mm diameter of tube at coupling point.

All dimensions measured with micrometer.
